Instructions: Right click on the ringtone name and select "save target as" to download the mp3 file to your computer. Remember where you download it to! Connect your cell phone to your computer via a USB or FireWire (IEEE 1394) cable, referring to your cell phone manual. Depending on your phone model (please refer to your model's manual), you may have the ability to transfer a music file from your PC to your cellphone by selecting the file from the folder you saved it into, and then initiating a file transfer to your phone. Some models may not require a connection to your PC and support web files. Simply input the URL of the mp3 file on our site into your phone for the destination of the ringtone, and download it directly to your cell phone (see your model's manual for help).
